Subject: Tetra Tech - State oversees license for southwest portion of Hunters Pt

Dear Roger,

Since Nina is out, I wanted to let you know about one of the state roles at Hunters Point Naval Shipyard. As you know NRC has sent the attached Notice of Apparent Violation to Tetra Tech because NRC oversees Tetra Tech's license to perform radiological work at the northeast portion of the Shipyard. At last week's EJ Task Force Meeting a member of the public asked you if the State is doing any investigation related to Tetra Tech's radiological cleanup work at Hunters Point. I wanted to let you know that CDPH has a corresponding role in the southwest portion of the Shipyard. Below is an excerpt from an inspection report that explains this. So CDPH has its own inspectors. They coordinate with NRC. The attached inspection report shows that a CDPH inspector participated with NRC in that inspection. I don't know whether or not CDPH is conducting its own investigation of Tetra Tech in activities in its jurisdiction. The first attachment is a map showing the dividing line between NRC & CDPH jurisdiction. The last attachment shows several of the areas where the Tetra Tech internal investigation found anomalous soil samples lie within the CDPH jurisdiction.

On August 6, 2009, the NRC published a Notice of jurisdiction and future involvement in the Federal Register, advising that the NRC would take a limited involvement approach regarding the Navy's ongoing remediation at the HPNS. The Navy hired contractors to decommission HPNS. Tetra Tech EC, Inc. maintains an NRC materials service provider license and is one of the contractors working at HPNS. Due to a variety of jurisdictional issues, the NRC has regulatory jurisdiction over contractor activities in the northeast portion of the HPNS and the State of California, an Agreement State, has regulatory jurisdiction in the southwest portion of the HPNS.
